

Estonia 

WERROWOOL OÜ is a small cellulose fibre insulation producer in Estonia that has developed an innovative, environment-friendly insulation material WerroWool. Although fibre insulation materials have a long history, WerroWool has several innovative elements compared to the other similar insulation materials. WerroWool was developed in the cooperation of the company's innovation team and several research institutions. Through its integrated management model (ISO 9001 certified and EMAS registered) the company addresses also customer satisfaction, as well as engagement of employees and local community. Werrowool was the overall winner of the Estonian Environmental Award for Business 2013 and was selected among the three most successful companies in the Management Award category of the 2014 European Business Awards for the Environment (EBAE).

Solutions:

Cellulose fibre - the cosiest insulation material [1]
