

Denmark 

SerEnergy develops, manufactures and sells fuel cell stacks and fuel cell power modules for system integrators worldwide. We pride ourselves on providing high quality and environmentally conscious energy solutions. Our fuel cell stacks transform hydrogen feedstock and oxygen from the air into electricity - with zero CO₂ emissions. The only waste products from the fuel cell reaction are water and heat.

Solutions:

Ser Energy Mobile Hybrid Power [1]

Sector:

Electricity, gas, steam and air conditioning supply [2]

Where is the business located?:

Majsmarken 1

9500

Denmark

DK
